COMPILER'S NOTE

While studying at Leipzig, a special branch of Medici[n]
an Alexander von Humboldt Scholarship-holder during the
1936—'37, I visited, during my vacations, almost all the cou[n]
of Europe and called upon the eminent Indologists of
respective places. I obtained a Photo from each of them
also collected the Photos of the late Indologists, thus ma
a total collection of 103 Photos of these Savants, which are
published here in an uniform size. This is not a complete colle
of Photos of the eminent Indologists of the West as there ar
some more whose Photos ought to have been included herein
unfortunately, they were not received in time, and hence,
got to be excluded.

I have given a short description below each Photo, g
the full name, place, birth-date, date of demise and a coup
important works of each Scholar, as far as possible, but in
of those whose dates are not known to me, I have put the si
interrogation (?). The photos are fastened with a loose-s
knot, so that, all or any one of them could be easily taken
for framing purposes. It is hoped, that this Album woul
as a living source of inspiration and agitate the studies of Ind
in our minds.

Lastly I am greatly indebted to all these Scholars who
co-operated with me in giving me their photos a
my hearty thanks to them for the same.
